Fri, 07 Dec 2018 19:56:00 GMT Lectures on Classical Differential Geometry: Second ... - The term differential is used in calculus to refer to an infinitesimal (infinitely small) change in some varying quantity. For example, if x is a variable, then a change in the value of x is often denoted $\hat{\Delta}x$ (pronounced delta x). The differential dx represents an infinitely small change in the variable x . The idea of an infinitely small or infinitely slow change is extremely useful intuitively ...
