Thu, 06 Dec 2018 16:51:00 GMT Snakes in Connecticut - Agkistrodon contortrix is a species of venomous snake endemic to Eastern North America, a member of the subfamily Crotalinae (pit vipers). The common name for this species is the copperhead. The behavior of Agkistrodon contortrix may lead to accidental encounters with humans. Five subspecies are currently recognized, including the nominate subspecies described here.

Thu, 06 Dec 2018 04:41:00 GMT Agkistrodon contortrix - Wikipedia - Agkistrodon piscivorus is a venomous snake, a species of pit viper, found in the southeastern United States. Adults are large and capable of delivering a painful and potentially fatal bite. When threatened, they may respond by coiling their bodies and displaying their fangs. Although their aggression has been

exaggerated, individuals may bite when feeling threatened or being handled.
